

Electromechanical Assembly Capabilities

- Cabinet assembly
- Controls panels
- Racks
- Enclosures
- Panel wiring
- Sub-assemblies
- Cable, Harness & Loom fabrication (see separate capabilities)

Roscan Electronics having been assembling enclosures for the whole of it's forty year history. From full cabinet wiring and assembly, through to control panels, racks, enclosures and panel wiring.

Four decades of experience and know how of electronics assembly ensure that we maintain the highest standards of workmanship. Enclosures are sourced from our partners, one of which is located adjacent to our manufacturing facility. With our own in-house WHMA A-620 cable and harness fabrication and IPC-A-610 PCB assembly, fabrication of "boxes" is achieved with industry leading delivery performance supported by ISO 9001 approval.

Roscan Electronics electromechanical assemblies are supplied to many leading blue-chip businesses, and with continuous investment in technology and manufacturing enhancements, the list of household names entrusting their fabrication to us, continues to grow.
