

ELECTRONICS

COUNTERFEIT COMPONENT POLICY STATEMENT

Roscan Electronics recognises that the counterfeit components are a global problem and as such implements stringent and robust policies to ensure our supply chain integrity and protect our customers.

To provide quality products Roscan Electronics Ltd. purchase parts directly from;

- Manufactures (OCM)
- Manufacturers' approved franchise distributors
- Manufacturers' approved agents and representatives
- OEM/CEM bonded inventories

Furthermore, Roscan Electronics, through internal procedures, continuously monitors the performance of its approved supplier database, ensuring conformity to industry best practice.

Components are qualified by suppliers by provision of, Certificate of Conformity, Certificate of Compliance and Certificate of Origin. If identified, Roscan Electronics will report counterfeit products to the relevant industry bodies.

Where products are obsolete or hard to find and cannot be sourced through our primary supply chain, Roscan Electronics will procure from sources that provide the least risk.

In these circumstances products procured through brokers or independent distributors are verified by our approved vendors and purchased subject to our clients approval.
